DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 and 12-15, drawn to an LED illumination system.

Group II, claim(s) 7-11 and 16-18, drawn to an LED module.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The device in Group I comprises a single light-emitting structure having a substrate, a heat conducting layer, a conductive layer, a light emitting diode chip and a connector. However, the device in Group I also comprises a power supplying terminal and a socket for supporting the connector. Therefore, Group I and Group II are lacked of this common technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
